

Program Snapshot

Title	Junior Faculty Research Grants (FRGs) in Sciences, Willson Center for Humanities and Arts Junior and Senior Faculty Grants, Poverty and the Economy Grants
Purpose	To provide "seed money" in support of research and scholarship by faculty
Deadlines	Sciences and Humanities and Arts: First Tuesday in October Poverty and the Economy: Last Friday in September
Eligibility	Available to instructors, tenure-track faculty, and research scientists; Sciences FRGs are designed for early career faculty (assistant professors and assistant research scientists); Willson CHA grants fund both junior and senior faculty; Poverty grants are limited to professors, associate professors, assistant professors and instructors on tenure-track appointments and senior research scientists.
Amounts	No explicit limit, but average grants are in the \$3,000 - \$10,000 range
Questions?	Sciences Proposals: Jessica Hawks, jhawks@uga.edu , 542-5056 Humanities and Arts Proposals: Julie Dingus, jdinus@uga.edu , 542-3966 Poverty and the Economy - Technical Submission Support: Jessica Hawks, jhawks@uga.edu , 542-5056 Poverty and the Economy - Proposal Content: Dr. Steve Dempsey or Danny Bivins, dempsey@uga.edu or bivins@fanning.uga.edu , 542-1108

Program Description

The Vice President for Research solicits proposals from members of the University faculty for financial support of research projects through the Faculty Research Grants Program. This program is sponsored by the University of Georgia Research Foundation, Inc.

The goal of the program is to support and encourage the development of strong programs of research and creative scholarship by early career faculty members throughout the University. (Willson CHA grants are also available to more senior faculty.) Grants are considered "seed money" for research, in that they should lead to the growth and development of continuing research programs. They are not a source of continuing support for an ongoing program, nor should they be viewed as an alternative source of funds for programs already developed to a level that normally would justify support from external agencies. Neither should they provide

"matching" funds, where such funds are required as part of an external proposal, nor travel funds to attend professional meetings. Support for these items is provided by the schools and colleges, or in special cases, through the Office of the Vice President for Research.

Proposals will be peer reviewed by subcommittees selected according to research discipline. Applications for research in basic life sciences, applied life sciences, physical and mathematical sciences, social and behavioral sciences, and professional and applied studies are coordinated by OVPR. Applications for research in the humanities and arts are reviewed by the Willson Center for Humanities and Arts. Applications for the Poverty and the Economy Grants are reviewed by the Office of the Vice President for Public Service and Outreach.

Eligibility Criteria

Eligibility for Sciences Faculty Research Grants is limited to UGA instructors, assistant professors on tenure-track appointments, and to individuals holding the appointment of assistant research scientist. Temporary, visiting, adjunct, or part-time faculty are not eligible, nor are postdoctoral research associates or fellows.

Willson Center for the Humanities and Arts grants fund both junior and senior faculty.

Eligibility for Poverty and the Economy Grants is limited to professors, associate professors, assistant professors, and instructors of the University of Georgia who are on tenure-track appointments according to Board of Regents policy, and to individuals holding the appointment of permanent assistant, associate, or senior research scientists. Public Service and Outreach faculty of all ranks are also eligible for Poverty and the Economy Grants. Temporary, visiting, adjunct, or part-time faculty are not eligible, nor are postdoctoral research associates. ***Please note that the Poverty and the Economy Grants have supplemental guidelines drafted by The Office for Public Service and Outreach. These supplemental guidelines can also be found on our website under Forms and Policies. For further information, please contact The Office for Public Service and Outreach.***

In a given year, only one proposal may be submitted by any eligible individual. If appropriate, proposals may be submitted jointly by more than one individual, but no individual may serve as proposer on more than one project, whether joint or single. In order to *submit* a proposal in consecutive years, any reports due on the previous projects must be received by OVPR. In order to *receive* a Faculty Research Grant in consecutive years, any reports due on the previous projects must be received by OVPR *and* the previous project must be completed.

Budget/Funding

Although no upper limit has been established for these grants, limited overall funding dictates that proposals with unusually large budgets must have strong justification to receive high priority. In general, grants are expected to be in the range of a few thousand dollars (in the past several years, the average grant has been in the range of approximately \$3,000 to \$10,000).

Faculty Research Grants will provide support for the following categories of expenditure:

- General expenses of research, such as supplies, materials, services, animals and animal care costs, etc., that are essential to the project (publication charges are not allowed).

- Equipment essential to the research being proposed. Equipment requests should relate to a particular project, even though the equipment may be used beyond its conclusion. Funding for more general equipment should be requested from other programs. *Equipment requests should be accompanied by an explanation of why the equipment was not covered by startup funds.*
- Travel costs, including subsistence, which are essential for the conduct of the research. *Travel to professional meetings, even to report on research supported by a Faculty Research Grant, will not be funded through this program.*
- Graduate research assistants as support staff for faculty research. Grants are not intended to support solely students' thesis or dissertation research. Proposals requesting graduate student stipends should make clear the role played by the student in the faculty member's research program.
- Labor costs for other personnel essential to the project.

Application Procedures and Documentation

In preparing proposals for this program, an applicant should remember that the review subcommittees cannot include specialists in every field. It is very important, therefore, that proposals communicate the significance of the work to scholars from other disciplines, as well as provide enough detail to permit technical evaluation by those more familiar with the area. The format requirements for proposals, given in these guidelines, are written with this need in mind, and it is essential that proposals follow them as closely as possible.

It is also true that review subcommittee members serve their colleagues on a voluntary basis, and it is imperative that proposals be submitted in a format that does not make inordinate demands on their time. For this reason, limitations on both length and style have been established and will be enforced. Proposals must be prepared and will only be accepted on the application form provided here: <http://www.ovpr.uga.edu/docs/forms/iga/FRG-Application.pdf>. **To complete, save and submit the application via email you need Adobe Acrobat Professional. Adobe Acrobat Reader allows the applicant to fill in the form, but not to save your work. If you only have access to Adobe Acrobat Reader you can complete, print then scan the application to submit via email.**

The proposal application contains the following components:

- *Cover Sheet.* The first page of each proposal must be the program cover sheet, completed according to its directions.
- *Biographical Sketch.* Do not attach a CV. All pertinent information should be covered on this form, with its attachment (publication list). [NOTE: To attach the list to the application, click "Document – Insert Pages", then search for and insert your publication list. Please attach the list to the end of the application. If unable to attach the list to this application please send the list as a separate electronic document or, in the case of submission by CD, save as a separate document on the CD.]
- *Compliance Requirements Form.* This form *must* be submitted, indicating which areas of compliance (if any) *will be* required for the project. If your proposal is selected, funding will not be released until the compliance requirements have been met and certified.

- **Budget Form.** These worksheets will assist in deriving budget amounts for the proposal cover sheet and should also be attached to provide additional information. The appropriateness of the budget will be considered during the evaluation process, and budgets may be adjusted by the review committee.
 - Each item in the budget *must* be justified as an expenditure required by the research plan and not available through other sources.
 - If large items of equipment are requested, this section must indicate whether similar equipment already exists on campus and, if so, how fully it is currently utilized and why the equipment was not requested as part of the recruitment package.
 - The benefit calculation must be included if requesting funds under the Personnel: Faculty (PI) – Course release buyout to department section. Consult your department's business manager for the correct benefit percentage.
 - To be eligible for course release in the summer (Personnel: Faculty (PI) – Course release buyout to department section), the PI must have Instructional EFT in the Summer and this must be reflected in the EFT table on Page 1 of the application.
- **Letter of Support (1-page limit).** **For proposals in the Sciences and Poverty and the Economy only.** This should be completed by the applicant's mentor or department head and should endorse the project and focus on the significance of the project.
- **Overview (2-page limit).** This section should describe, in a way that can be understood by faculty members in areas different from your own:
 - a. The research question you propose to answer (first paragraph),
 - b. The contribution of this research to the theory, methodology, practice or literature of your field,
 - c. How this research differs from earlier research in the field,
 - d. How this project will contribute to a significant program of research beyond FRG support.
- **Research Plan (4-page limit).** **For proposals in the Sciences and Poverty and the Economy only.** This section should: provide a detailed description of what you propose to do and its purpose and significance; identify relevant research questions; and establish the merit and feasibility of the project. It should describe in detail methods and procedures, facilities available, and a timetable for completing the work.
- **Future Support (1-page limit).** **For proposals in the Sciences and Poverty and the Economy only.** Potential sources of support for continuing the program initiated by the grant should be identified. If external support will be required, agencies to be approached should be specified. Also, if this research is included in any currently pending external proposal, that proposal should be identified.

Application Deadlines

Proposals in the Sciences and Humanities and Arts must be submitted by 5:00 pm on the first Tuesday in October. Proposals for the Poverty and the Economy Grants must be submitted by 5:00 pm on the last Friday in September.

Proposals in the Sciences and Poverty and the Economy should be emailed to ovprip@uga.edu or saved on a CD and sent to OVPR c/o Jessica Hawks, 650 Boyd GSRC. **Please name the application file as [Last Name]_[First Name]_FRG-[Initials of Committee]. For example, the application for John Smith for the Applied Life Sciences Committee would be named as "Smith_John_FRG-AL." (See below for Initials.) Please label all separate attachments clearly.**

Proposals in the humanities and arts should be signed by the applicant and department head. Applicants should submit seven copies stapled in the upper left corner to the Willson Center for Humanities and Arts by 5:00 pm on the first Tuesday in October. Do not use binders or covers.

Evaluation Criteria and Procedures

The goal of this grants program is the development and maintenance of excellence in the overall research program of the University. Thus, while the quality and significance of the work proposed are of paramount importance, special consideration will also be given to other factors relevant to the university-wide nature of the program. For example, proposals from faculty in the earliest stages of their scholarly development will generally receive higher priority than those early career faculty who have established programs, consistent with the "seed money" concept of these grants. "Pilot studies" opening a new area of research will have an advantage over proposals to continue an already well-developed program.

Major points that reviewers will consider are given below (this list is not meant to be exhaustive).

General

- a. Does the proposal communicate the importance of the work and the enthusiasm of the proposer?
- b. Have the proposal format guidelines (especially page limits) been followed?

Significance

- a. Is the importance of the project within its field made clear?
- b. Is the field one that is, or should be, within the scope of the University's research program?
- c. Will successful completion of the project have an impact upon the field?
- d. Is the project significant to the development of a program of scholarly activity by the proposer?

Project Design

- a. Are the objectives clearly defined, and is the basic question to be answered clearly identified?
- b. Are all necessary facilities available?
- c. Does the proposer have the necessary background and expertise?
- d. Are project activities well planned, and do they realistically fall within an appropriate timetable?

Budget

- a. Have all items requested been justified?
- b. Is the amount requested reasonable and consistent with the total funding available to this grant program?
- c. If equipment is requested, has the possibility that it is already available elsewhere on campus been addressed? *An explanation as to why the equipment wasn't provided upon*

hiring should be included.

- d. If support for graduate students is requested, is it clear that their activities are essential to the proposer's research program?

Appropriateness to this Program

- a. Is the proposal consistent with the "seed money" concept, which gives (early career) faculty an opportunity to establish themselves and initiate new programs of research?
- b. Will the proposed project lead to further funding from external sources if continued support is needed and normally available in this area of research?
- c. Would it be more appropriate for this proposal to be submitted directly to an external sponsor?

Review Subcommittee Structure

Applications for research and scholarship in humanities and arts are peer reviewed by a faculty committee within the Willson Center for Humanities and Arts. Applications in the following areas are peer reviewed by separate faculty subcommittees in each area.

AL. Applied Life Sciences. Research covering application of scientific principles or technology in the life sciences.

BL. Basic Life Sciences. Basic research in the life sciences.

PM. Physical and Mathematical Sciences. Research in the natural sciences outside the life sciences.

PA. Professional and Applied Studies. There has been some overlap in the proposals submitted to this and the next subcommittee. Applications reviewed by this subcommittee will be evaluated with emphasis on their expected contribution to the development of techniques, the improvement of practice, and/or the enhancement or understanding of a recognized field of professional practice. Applications covering the following areas are appropriate to this subcommittee:

1. Studies that proceed from professional practice in a defined or designated industry or government agency.
2. Studies that respond to or answer a question raised by a problem faced by an industry, trade organization or government agency.
3. Studies that service a specific clientele.
4. Studies that are intended to improve government or trade practice, functioning or effectiveness.

SB. Social and Behavioral Sciences. Generally, any applications that do not fit into the itemized list given for the previous subcommittee will be reviewed by this subcommittee. These applications will be evaluated with emphasis on anticipated contributions to theory building and testing in one or more fields of social and behavioral sciences.

Award Procedures and Conditions

All research carried out under the sponsorship of a Faculty Research Grant is subject to all of the University's standing policies regarding research. In particular, proposers of projects involving human subjects, laboratory animals, biohazardous materials, recombinant DNA, etc.,

must obtain the necessary approvals before commencing work. Money awarded cannot be released until these forms, when appropriate, have been submitted and approved.

Time Period. Grant funds must ordinarily be spent during the calendar year immediately following the award. Funds not used within the award year will be forfeited.

Continued Eligibility. It is expected that those who receive a Faculty Research Grant will continue to meet the eligibility requirements. Any grant recipient who, because of resignation or any other reason, fails to remain eligible at least through December 31 of the award year may be required to return the grant funds.

Reports. The *initial report*, summarizing what has been accomplished during the grant period, must be received by January 31 of the year following the award year. The *final report*, including information on publications and grant proposals generated as a result of the grant, must be received by January 31 of the second year following the award year. Report forms are available on the OVPR website and should be turned in via email to jhawks@uga.edu or via campus mail to Jessica Hawks, Room 650, Boyd GSRC.

At any time that you receive external funding resulting directly from a faculty research grant, you should submit a *Resulting Funding Report* (available on the OVPR website) to OVPR via email to jhawks@uga.edu.

Duplicate Funding. If, prior to an FRG being awarded, external funding is obtained to support any of the items requested in the proposal, the grantee must promptly notify the University of Georgia Research Foundation, Inc.

Acknowledgment. Funds for awarded Faculty Research Grants come from the University of Georgia Research Foundation, Inc., and any publications resulting from the projects awarded should acknowledge the source of funds: "(a portion of) this research was supported by a grant from the University of Georgia Research Foundation, Inc."

FAQ

I am a Research Professional IV; can I apply for a Faculty Research Grant?

No. This is a staff position; FRG funding is limited to faculty positions, both tenure-track and non-tenure track.

Can I request money to attend a conference to present the results of my research?

No. Travel to conferences is most often supported through colleges or (for foreign conferences) can be requested through the OVPR Foreign Travel Assistance program.

I need more time to complete my project and spend the money in my account. What do I need to do?

To request an extension on your project and account please submit the Faculty Research Grant Project Request form to jhawks@uga.edu: (Available on the OVPR website.) Your request will be reviewed as quickly as possible and notification sent to you via email.

I have been awarded a faculty research grant and want to change my budget. What do I need to do?

To request a reallocation of your budget please submit the Faculty Research Grant Project Request form to jhawks@uga.edu: (Available on the OVPR website.) Your request will be reviewed as quickly as possible and notification sent to you via email.

May I submit and be awarded a Faculty Research Grant in consecutive years?

In order to *submit* a proposal in consecutive years, any reports due on the previous projects must be received by OVPR. In order to *receive* a Faculty Research Grant in consecutive years, any reports due on the previous projects must be received by OVPR *and* the previous project must be completed.
